Dhamen, Protecting Your Rights...

Offering secure and reliable e-sales operations to sellers and consumers is vital to any flourishing business. Such demand kindled our innovation to introduce Dhamen, a Payment Processor Service for various fields using an Escrow Account.

It is developed and designed to serve electronic platforms that required a financial mediator to guarantee and oversee the releases of goods' value or services' value prior receive of goods or services. Dhamen locks payments temporarily until all transactions between parties are completed, as per agreed terms and conditions
