such as government entities, healthcare facilities, and schools

Packages

Basic Yakeen (Online)

- Support sectors that require verification on a daily basis, as verifying data remains a basic and necessary procedure, such as banks and insurance sectors.
- Verify all data and re-send it to entities immediately, by connecting their systems directly to government systems databases.

Direct Yakeen (Batch)

- Support sectors that need a one-time verification process, such as verifying the identity or data of residents or citizens.
- Verify all data and resend it to the entity within a specified timeframe.

Yakeen IPO

- Support banks and financial companies that manage IPOs, whether in stocks or real estate funds, to enable them to verify subscribers' data and information.

Baqah Rowad

- Support entrepreneurs and startups in verifying their transactions, in addition to many other features. Explore more by visiting Baqah Rowad Page.
